

THE PHARMACY SMALL DOSE

Alum named trustee of St. Anne School Foundation

Patrick Ward (B.S. '86) was recently named one of four trustees by the executive director of the St. Anne School Foundation, Molly DeDeminicis. Ward has served as the executive director of business development since November 2002 for Encysive Pharmaceuticals. Prior to joining Encysive in 1994, Ward worked as an independent pharmacist and pharmacy management consultant to hospital, home infusion and retail pharmacies. He gained management experience from his involvement at Owen Healthcare, Inc, now part of CardinalHealth, in the late '80s. In addition to his degree from the College of Pharmacy, Ward holds an M.B.A. in finance from the University of St. Thomas and is a Registered Pharmacist.

Alumna working to fight breast cancer

Machelle De Ron (B.S. '86) worked as a volunteer for the 14th Annual Susan G. Komen Breast Cancer Foundation Houston Race for the Cure held downtown in Eleanor Tinsley Park on October 2. As the Race's medical committee chairwoman, De Ron's mission to help women fight breast cancer through education stems from her personal battle with the disease a year ago. The Race hopes to raise over two million dollars for breast cancer research, education, screening and treatment programs. Seventy-five percent of the money raised will remain in Houston to help the local community and its facilities, while the remainder is given to the national organization to fund research grants.

College of PHARMACY
UNIVERSITY OF HOUSTON

Enhancing Patient Care Earns UH Pharmacy Students

Top Honors

First through Fourth Place Swept by UH in Texas Pharmacy Association Competition

Projects addressing asthma management, community wellness, high school outreach and medication labeling earned UH College of Pharmacy students top honors in a recent Texas Pharmacy Association (TPA) competition.

From left: Denise Martinez, Brice Labruzzo, Isaac Lopez and Molly Graham with Dean Ohia at the Texas Pharmacy Association Annual Meeting and Expo in July.

Placing first through fourth, University of Houston College of Pharmacy students swept the Texas

Pharmacy Association Innovative Pharmacy Project Competition recently held at the 125th Annual TPA Meeting and Expo in Dallas. Additional awards included the membership award from The Texas Pharmacy Association, Academy of Students of Pharmacy (TPA-ASP). Coming in ahead of the University of Texas at Austin, Texas Tech and Texas Southern University pharmacy colleges and schools, the UH College of Pharmacy won for having the highest percentage of its student body as members of TPA-ASP. Two UH alumni also were honored at the annual TPA meeting.

Sponsored by AstraZeneca and Elan Pharmaceuticals, the Innovative Pharmacy Project Competition judged projects on their execution, from the proposal to data collection. Submissions were to utilize practices applicable to the implementation of new policies to enhance patient care outcomes or medication control and delivery.

"The level of accomplishment of our students in this competition is a reflection of the high quality of education they receive from our college," said Sunny E. Ohia, dean of the UH College of Pharmacy.

Awarded first place, second-year student Isaac Lopez Jr. argued that several issues exist with over-the-counter medication labels in his project titled "Over-the-counter medication use enhanced with bilingual product information labels." Lopez focused on such factors as the small font size of text affecting the elderly and visually impaired, complex medication terminology and unavailability of multilingual product information for non-English speaking populations. Under the direction of Clinical Professor Sujit Sangiry, Lopez proposed to develop and evaluate bilingual product information labels in Spanish and English as compared to other over-the-counter marketed labels. After surveying participants in the study, who evaluated both the old and new labeling formats and Lopez' proposed format, he found that, overall, participants responded more positively to the newer, bilingual label designed by Lopez.

See TPA on page 6

The 8th Annual Scholarship 50 Luncheon

The College celebrates 188 scholarships given in support of students

Scholarship donors met their recipients over lunch at the 8th Annual Scholarship 50 Luncheon. Donors, students, faculty, and staff came together for an afternoon of fellowship to celebrate the college's banner year—188 scholarships totaling nearly \$140,000. Three new Presidential Endowed Scholarships (PES's) were awarded this year: The Paul and Manmeet Likhari PES, The Bexar County PES, and the Cynthia Passarelli PES. These scholarships are the college's most prestigious—awarding \$1,500 per year for four years to first-year students.

Paul Likhari with the first recipient of the Paul and Manmeet Presidential Endowed Scholarship, first-year student Bre Watzak.

message from the dean

Greetings!

First of all, I welcome all students back for a new academic year. We especially welcome the Class of 2008 to our 57-year old College. We promise to offer them (and the rest of the students, of course!) a superb learning environment for the next four years.

Over the past year, our students have excelled in leadership roles in several professional organizations at the state and national level. For instance, our students won all four prizes at the recently concluded Texas Pharmacy Association Innovative Pharmacy Project competition. The success of our students in assuming leadership roles at both state and national levels is a positive reflection of their high level of professionalism.

We are truly proud of them!

Best wishes,

Sunny E. Ohia, Ph.D.

Shara Zatopek, B.S., M.A.
Associate Dean for Academic Affairs

Shara L. Zatopek, clinical associate professor, has been appointed associate dean of academic affairs. Previously she served the college as the assistant dean for professional programs and assistant dean for admissions. She joined the faculty in 1979 as a guest lecturer and adjunct instructor.

In 1989, she was appointed clinical associate professor and joined the faculty full-time as the hospital and community experiential coordinator.

Ms. Zatopek received a Bachelor of Science degree in Pharmacy from the University of Houston College of Pharmacy in 1974 and a Master of Arts degree in Psychology from Houston Baptist University in 1999. Her professional memberships include APhA, where she was selected the national Outstanding Chapter Advisor for ASP (Academy of Students of Pharmacy). She has been active in TPA and was elected to the Board of Directors and Speaker of the House of Delegates. TPA honored her with the Bowl of Hygeia Award and the Educational Excellence Award. Ms. Zatopek has been involved with the Harris County Pharmacy Association, has served as president, and has been recognized as Pharmacist of the Year.

Faculty Spotlight

Sean Xie, Ph.D.

The addition of Xiang-Qun (Sean) Xie, Ph.D., MBA, to the Department of Pharmacological and Pharmaceutical Sciences (PPS) has created more exploratory latitude regarding G-Protein Coupled Receptors (GPCRs) research. The department previously had six faculty members researching the signaling and trafficking of GPCRs such as adrenergic dopamine and opioid receptors. Xie's research focuses on how the structures of GPCRs change when they bind with various drugs and attempts to use the knowledge of those structural changes to improve drug design and, ultimately, therapeutic outcomes. His expertise in medicinal and computational chemistry and NMR biophysics, when added to that of existing departmental faculty, creates a strong synergy in GPCRs pharmacological research, according to Department Chair Douglas Eikenburg, Ph.D.

Xie and his team are targeting an important GPCR – the cannabinoid CB2 receptor – attempting to discover CB2-selective lead compounds for clinical use. Historically, preparations of Cannabis Sativa (e.g. marijuana, hashish) were used for therapy as well as recreation as early as 3000 B.C. It is now realized that it has many potential therapeutic uses including lessening the effects of cancer chemotherapy, pain, muscle spasms, glaucoma, and immune suppression. These newly

discovered therapeutic applications have opened doors to scientists in various fields worldwide.

“The CB2 receptor subtype was selected,” said Xie, “because it is expressed in high quantities in the human spleen and tonsils, is involved in the signal transduction processes within the immune system, and can potentially be a drug target for immune system modulation. However, the development of therapeutic cannabinoid mimetics has been hampered due to limited structural information about the target protein, the CB2 receptor.”

See Xie on page 3

New Administrative Appointments

Andrea Smesny, M.P.H., Pharm.D.
Assistant Dean for Student Affairs

Dr. Smesny was most recently Pharmacy Skills Program Coordinator and Community Wellness Program Director at the University of Houston College of Pharmacy from 1999-2004. The major focus of her practice has been the development of the Community Wellness Program, in which she and pharmacy students deliver many types of health services, screenings, and educational seminars to residents of Houston and surrounding communities. Prior to that, she served as Clinical Coordinator for the Pharmacy Department at Northeast Medical Center Hospital in Humble, Texas.

Dr. Smesny earned her bachelor's degree in biology at the University of Houston, her master's in public health at the University of Texas School of Public Health, and her doctor of pharmacy degree at the University of Houston College of Pharmacy. Her research interests include health and wellness and medication education for children.

Paige Pitman, B.S., M.B.A.
Director of Admissions

Ms. Pitman has received two degrees from the University of Houston: a Bachelor of Science in Pharmacy in 1994 and a Master of Business Administration in May 2003.

Since 1999, she has worked for the College of Pharmacy as director of recruitment and as a clinical assistant professor. In addition to her recruitment activities, her new appointment expands her role to include the admissions process. Ms. Pitman remains affiliated with St. Luke's Episcopal Hospital as a patient care area pharmacist.

Newsletter for College of Pharmacy

Accolades

RICHARD BOND

Richard Bond, Ph.D., associate professor of pharmacology, appeared in the July 2004 issue of Nature Reviews in a question and answer forum on drug discovery. Bond appeared along side 19 distinguished scientists and researchers from around the world to answer questions and provide opinions about G-Protein-Coupled Receptors and drug discovery.

DIANA CHOW

Diana Chow, Ph.D., associate professor of pharmaceutics, recently received an unrestricted gift of \$45,000 from Houston-based Gillson Logenbaugh Foundation for a period of one year beginning in July. The funding is a continuation of support Chow received from last year's gift totaling \$37,500 for research on the development of drug delivery for anti-cancer agents, with a focus on camptothecins.

E. JAMES ESSIEN

E. James Essien, M.D., Dr.PH., associate professor of clinical sciences, recently received first prize for Outstanding Poster Presentation at the 12th Annual National Institute for Mental Health International Research Conference held in Atlanta, July 21-23. Dr. Essien's poster titled "Effectiveness of an HIV Prevention Intervention for the Nigerian Uniformed Services" received the top honor during the conference, which focused on the Role of Families in Preventing and Adapting to HIV/AIDS.

DAVID HAYES

David Hayes, Pharm.D., clinical assistant professor, recently was named the 2004 Outstanding Allied Health Professional by the Alzheimer's Association for his commitment to the estimated 70,000 individuals with Alzheimer's disease, as well as their family members and caregivers, in Southeast Texas. Hayes' work is secondary to his volunteer work centered on educating caregivers and patients about therapeutic agents used to treat the disease and associated disorders.

Xie

from page 2

"Overcoming these limitations requires innovative approaches", said Xie, "either through development of new techniques or by employing known technologies in new ways." Xie and his research team are attempting to develop a novel GPCR drug discovery platform. This platform is based upon integrating nuclear magnetic resonance (NMR) and computer modeling techniques into a 3-D *in-silico* pharmacophore database search approach.

"It is our hope to pursue novel drugs that bind selectively to CB2 receptors, or that can activate those receptors in novel ways, so that they can be developed into cannabinoid-type therapeutic drugs," said Xie. One attraction of this new approach is that it can be carried out as a "pre-screen" or "virtual screen," before costly experimental testing of large numbers of compounds. In addition, the developed methods and results are likely to be generalizable to drug discovery targeting other GPCRs.

Xie's GPCR research is currently funded with an \$800,000 National Institute of Health (NIH) grant. This support for CB2 receptor research explores an alternative technique for determining GPCR structural biology and studying drug-receptor interactions. His work will help the understanding of drug binding sites and mechanisms of action, which will help in the design of more specific drugs with fewer side effects.

In addition, Xie is participating as the Director of the Chemistry Coordinating Center in a six million dollar grant submission by the Gulf Coast Consortium (GCC). Along with faculty at other institutions within the Houston area, Dr. Xie has taken a key role in this project to establish a national drug-screening center in Houston. Should the grant be funded, this collaboration within the GCC scientific community will significantly strengthen drug research and discovery in Houston, and should positively affect biotech and small pharma companies in the greater Houston area as well.

MEET THE DEAN

CORPUS CHRISTI

On August 8th, Dean Ohia traveled to Corpus Christi to meet with several alumni in the area. The reception was held at Water Street Seafood Company. Alumni attending the event included Clemente Garcia Jr. (B.S. '51), Corando Rios Trevino (B.S. '71), Mary Hill (B.S. '82), Robert Alvarez (B.S. '86), Edward Carrillo (B.S. '78), Sharon McLean Carlson (B.S. '75), Mark Carter (B.S. '90), Kacy Wagner and wife Tanya Tuckett (Pharm.D. '02).

Kacy Wagner, Tanya Tuckett, Dean Ohia, and Dr. Ekanem Ohia Alvarez (B.S. '86), Edward Carrillo (B.S. '78), Sharon McLean Carlson (B.S. '75), Mark Carter (B.S. '90), Kacy Wagner and wife Tanya Tuckett (Pharm.D. '02).

LUBBOCK

On August 22nd, several College of Pharmacy alumni and friends gathered to meet Dean Ohia at the Holiday Inn in Lubbock. Pictured with Dean Ohia are the three alumni able to attend the event: (from left) James R. Lovering (B.S. '75), Theresa Ann West (B.S. '88), and David Michael Hurd (B.S. '78). Also in attendance were Gene and Susan Lake, friends of the College of Pharmacy. Their daughter Sarah graduated with a Pharm.D. degree in 2000. She is married to College of Pharmacy Clinical Assistant Professor David Wallace (Pharm.D. '99).

New Faculty Appointment

Laura Gerard,
Pharm.D.

Laura Gerard joined the Clinical Sciences and Administration faculty as a clinical assistant professor this summer. She joins a group of faculty specializing in infectious disease study. Before coming to the College, she completed two years of residency training, one in general pharmacy practice and one in infectious disease pharmacy practice, at the University of Kentucky Chandler Medical Center in Lexington. Dr. Gerard received her Doctor of Pharmacy degree in 2002 from the Nesbitt School of Pharmacy at Wilkes University in Wilkes-Barre, Pennsylvania.

Alumni Profile *Specialty Drug-Making*

Lance Campbell, Pharm.D.

The area of specialty drug making, or compounding, is one of the most innovative areas in the field of pharmacy. However, many students seek a different professional path. Why? Compounding pharmacies tend to be smaller operations, and some pharmacy owners may not have the resources to support Pharm.D. graduates—leaving pharmacy ownership as the risky alternative. With independent pharmacies on the decline, most students enter pharmacy school with a focus on retail, hospital pharmacy or sales.

Lance Campbell (Pharm.D. '01) was no different. "My end goal was to become a pharmaceutical rep. A couple of friends and I started SIPP [Society of Industrial Pharmacy Students] with the corporate setting in mind," he said.

But Campbell became intrigued with compounding after experiencing the lab course held at Professional Compounding Centers of America. "I found compounding to be innovative—an area in pharmacy that can do amazing things and have an impact on people's lives."

Before graduation, Campbell completed a rotation in a small, independent compounding shop. The experience was so fulfilling that he decided that he wanted to operate his own pharmacy. Campbell set a goal to own a store within three years of graduation.

"If you don't set goals, you wander," Campbell said.

Campbell's rotation at the compounding shop developed into a full-time position following his graduation from the college. Longing to learn more about the business of operating a store, Campbell advanced to a large retail pharmacy, where he was responsible for marketing and managing a pharmacy team.

"Moving away from compounding for a short while allowed me to

experience a different side of pharmacy," he said. "It was more of a challenge because of the increased responsibility, and at the same time, really gave me business sense."

In March of 2003, less than two years after graduation, Campbell opened his independent compounding pharmacy on Kirby, just minutes from the Texas Medical Center in Houston.

"The experience I had with both jobs after graduation was invaluable. The manner in which I set up and run my pharmacy today extends from the lessons I learned in those different types of pharmacy environments," he said.

Though his pharmacy is currently operating at a profit, Campbell recalls the hardships he faced when opening his shop. "I actually questioned whether or not I had made a mistake at first," he said, "because I literally sat staring at the phone waiting for it to ring. I think I provided care to only four patients the first week."

Determined, he took the time to introduce himself to the medical community and, before long, developed many relationships with health professionals within and around the Texas Medical Center. Though he was the store's only employee for several months after the opening, business is now such that he has been able to support a small staff—giving jobs to both prospective pharmacy students and enrolled students on rotation.

"Compounding is not only innovative, but personally fulfilling," he said. "Owning an independent store is somewhat risky and at times hard. To me, it was about setting that initial goal and accomplishing it."

Alumni Mailbox

Julie Adkison (Pharm.D. '00) gave birth to a son, Cade Patrick, on July 7, 2004.

Bruce Biundo (B.S. '61) was recently awarded Pharmacist of the Year by the Houston Area Pharmacy Association. Biundo also is president of the Pharmacy Alumni Association and serves on the Dean's Advisory Council.

Martha Durham (Pharm.D. '03) finished her residency at Baylor University Medical Center in Dallas and is now employed at Hendrick Hospital in Abilene as a clinical pharmacist.

Mikki Johle (Pharm.D. '03) has been accepted into the Master of Science program in Health Informatics at the University of Texas-Houston Health Sciences Center, School of Health

Information Sciences. She is the first pharmacist to enter the multidisciplinary program and plans to graduate in December 2006. While attending school part-time, Johle will work as a consultant pharmacist at LLW Consulting.

Rachael Kuntz (Pharm.D. '02) and Shawn Kuntz are the proud parents of Ashlyn Isabel, born on March 21, 2004.

Jeffrey Loesch (Pharm.D. '02) and Kimberly (Hairston) Loesch (Pharm.D. '02) are the proud parents of Ashley Grace, born May 31st.

Bryan Prescott (Pharm.D. '01) and **Renee Remmert** (Pharm.D. '02) married on November 25, 2003 in Key West. UHCOP alumni **Jeremy Coffey** (Pharm.D. '01), **Jasper Lovoi** (Pharm.D. '02), and **Jennifer Wade** (Pharm.D. '02) attended the ceremony.

Sherry (Womack) Scott (Pharm.D. '02) and Robb Scott are proud parents of Matthew Warren, born on December 16, 2003.

Joseph Vazhappilly (Pharm.D. '00) was promoted to quality supervisor at Medco's Irving, Texas call center pharmacy. He married his wife Texa in 2001 and they have a 9-month-old daughter. Joseph recently began to work on his M.B.A.

Jennifer Wade (Pharm.D. '02) and Thomas Wade are proud parents of Skyler MacKenzie, born February 17, 2004.

Several pharmacy alumni accepted positions as the Houston Area Pharmacy Association's Annual Officer Induction Banquet. The following UH alumni were inducted:

Treasurer
Renee Prescott (Pharm.D. '03)

Treasurer-Elect
Michelle Edwards (Pharm.D. '04)

Directors (3-year term)
Lance Campbell (Pharm.D. '01)
Dana Doyle (Pharm.D. '01)
Bamrom Jonathon (Pharm.D. '01)
LaTosha Mitchell (Pharm.D. '01)
Renee Prescott (Pharm.D. '02)

Councilor (3-year term)
Lynn Simpson (Pharm.D. '96) will continue her three-year term as Councilor until 2005.

Please e-mail
interactions@uh.edu
to contribute to the
alumni mailbox!

PASSAGES

Albert V. Baltruzak

Albert V. Baltruzak (B.S. '51) passed away May 28, 2004 at the age of 90 in Kingsville. He served in the U.S. Army as a Captain before seeking a B.S. in pharmacy from the University of Houston. Baltruzak worked as the chief pharmacist at Lufkin Memorial Hospital and Spohn Hospital in Corpus Christi before moving to Kingsville, where he owned West Kleberg Pharmacy.

Noxie M. Romano Jr.

Noxie M. Romano Jr. (B.S. '58) passed away June 28, 2004. He lived in Houston his entire life and worked as a pharmacist for over 24 years. He was supported in life by his wife of 50 years, Mary Ann, his eight children, and many grandchildren and great-grandchildren.

Newsletter for College of Pharmacy

PERSPECTIVE
Student Profile

Gavin Estrada

Third-year pharmacy student Gavin Estrada decided to become a pharmacist because of the flexibility in career options and the opportunities to meet new people. He's made use of his time in the college to explore both of these advantages.

"I enjoy talking and interacting with a variety of people," he said. "Pharmacy is a career field in which you can make a definite difference in someone's life."

In his free time, he plays classical acoustic guitar and keyboard. Although he has many years of training on the piano, Estrada prefers to play the guitar because of his love for rock music. He often plays for groups of friends, and, occasionally, at small local events like Frontier Fiesta.

"I like to make people laugh, smile and feel good about themselves," he said. "There seems to

be something about music that livens up a crowd."

When he finds time, he likes to delve into theatricals as well. Having always enjoyed acting and music, Estrada's creative side is balanced with a strong sense of logic. In 2002, he graduated from Texas A&M in Corpus Christi with a degree in microbiology.

"The advanced courses in science helped give me the knowledge I needed for pharmacy school," he adds. "Obtaining a degree before entering school is beneficial. I majored in microbiology because I found the biological aspect of drug interaction interesting."

Though Estrada has not determined the area in which he will practice after graduation in 2006, he spends his time concentrating on his studies, soaking up knowledge in all practice areas within the profession.

"It pays off to learn as much as possible the first couple of years," Estrada said. "I have found that on rotations, I knew more than was needed or expected. It was a good feeling to have obtained a good education thus far."

Networking and building relationships is also essential, according to Estrada. "Get to know a lot of people and get involved," he stresses to new and current students. "It will help you in school and in the future, because pharmacy is a small world."

Some of the organizations in which Estrada is involved in are the Phi

Delta Chi fraternity (PDX), the Academy of Student Pharmacists (ASP), and the Professional Recovery Network (PRN), in which he is able to strengthen his education about drug addiction and alcohol abuse while meeting healthcare professionals at national and state meetings. In addition, Estrada works with Barbara Tatum, director of counseling and advising, to help students and pharmacists with drug and alcohol recovery. He is the PRN representative for the College.

AmerisourceBergen

"A gift that goes a long way..."

AmerisourceBergen representative Kyle Benson, director of retail sales for the central region, presented Dean Ohia with a \$15,000 gift for student travel. Through the years AmerisourceBergen has supported the College of Pharmacy with gifts of over \$100,000.

Scholarship 50 Luncheon

Thirty-seven students received Golf Scholarships totalling \$23,000 this year. The students are pictured with two members of the Golf Executive Committee, Julie Spier of Randalls (center) and Louis Williams, associate professor of medicinal chemistry (center, second row). Williams started the Golf Tournament with Larry McClaugherty 25 years ago to raise funds for student scholarships.

Student News

Molly Graham, fourth-year student, has received the Texas Society of Health-System Pharmacists (TSHP) Research & Education Foundation General Scholarship for the University of Houston College of Pharmacy. She is recognized for her Community Wellness Seminar Series at a local community pharmacy, participation in professional activities aside from the classroom, and her passion for the profession of pharmacy.

Fourth-year students Leyva Olivares and Brice Labruzzo were recently appointed to the Academy of Student Pharmacists Executive Committee of the Texas Pharmacy Association. Olivares is currently serving as a director, along with fellow classmates Denise Martinez, April Needham, and Sapna Parikh. She was appointed chair-elect for 2005. Labruzzo will serve as vice-chair.

TPA

from page 1

In second place, fourth-year students Brice Labruzzo and Denise Martinez participated in a high school outreach program to five area high schools to educate students on the pharmacy profession. During the next year, the UH College of Pharmacy will track the responses from interested students, several of whom already have contacted the college for information on the professional program.

A community wellness initiative by fourth-year student Molly Graham captured third place. She held a series of seminars to educate the public on diabetes, hypertension, stroke, cholesterol, MEDS for Kids, herbal and nutritional supplements, and osteoporosis.

"I took a couple of packets home to my mother who suffers from diabetes," said first-

year UH pharmacy student Arshunda Washington. "She is very resistant to reading about diabetes and asking questions. Because the information from the seminar was presented in a more readable and understandable format, my mother started following some of the instructions and recipes in an attempt to make a positive change in her lifestyle."

While only the students from the top three projects were asked to make a presentation at the conference, a UH student also took fourth place. Studying pharmacists' impact on asthma management in the community, fourth-year student Rosalyn Adigun assessed the impact that a pharmacist-patient relationship in a community setting can have in improving the management of asthma.

Jeena Jacob, third-year student and president of the University of Houston chapter of the Academy of Student Pharmacists (ASP), receives the TPA-ASP Membership Award from Tom Guidry, immediate past chair of the Texas Pharmacy Foundation.
